

Your Task

A data viz “expert” wanted to create stories using a dataset he discovered online. However, the output wasn’t exactly how he envisioned the graphs to be. Help our expert improve his graphs!

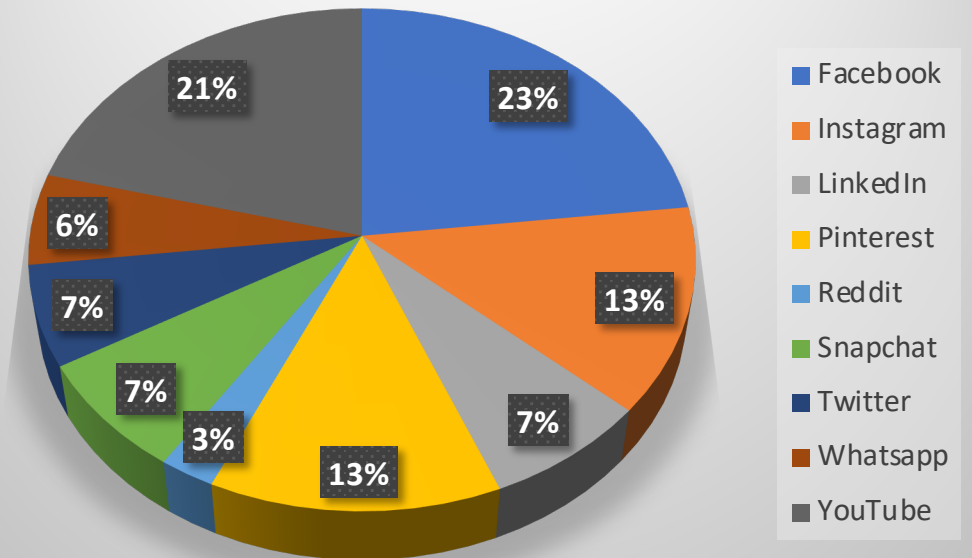

1. Understand the data and the story it is trying to convey
2. Identify elements of the graphs that are incorrect, unnecessary or misleading
3. Prettify the graphs! – Choose at least two graphs to re-create using Matplotlib or Seaborn
4. Create your data story by adding captions to slides
